Infographic: How industry is evolving and shaping the world

Industry is considered a driver for innovation, growth, and social stability. Did you know that it is responsible for 70 percent of the entire global trade? Learn more about the trends and challenges and why Siemens is a pacemaker of the 4th industrial revolution. [➤](#)

How green is wind power?

An offshore wind farm with 80 turbines produces 53 million megawatt hours of electricity during its 25-year service life and emits seven grams of CO₂ per kilowatt hour (g/kWh). In comparison, energy from fossil sources burdens the climate with an average of 865 g/kWh. ↗

Hannover Messe 2015 – the highlights

On April 17, the most important industry trade fair came to a close. If you couldn't make it to the Hannover Messe, you can review our highlights in our video. ↗
